[†] Figures not available.

Explanation of symbols used:—B.-Births; B.R.-Birth Rate; C.-Cholera; S.-Smallpox; P.-Plague; F.-Fevers; D.D.-Dysentery and Diarrhoea; R.D.-Respiratory Diseases; M.D.-Maternal Deaths; D.R.-Death Rate; I.D.-Infantile Deaths (fucluded in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 9th August, 1952, relate to 219 towns with an estimated population of 29,440 thousands. The total number of towns is 281 and their population is 34,764 thousands. Thus 78% of the total number of towns representing 85% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 18,001 and 9,792 representing birth and death rates of 31 8 and 17.3 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 185 towns with an estimated population of 25,569 thousands. Information about Bihar could not be included. The total number of towns is 235 and their population is 29,570 thousands. Thus 79% of the total number of towns representing 86% of the total population is covered. The numbers of births and deaths recorded in these towns were

15,905 and 8,803 representing birth and death rates of 32.4 and 17.9 per thousand of population respectively. The table at the end gives the position by States

Chittoor in Madras was the only town which had a highdeath rate of 53:3 per thousand of population and this high a death rate was mainly due to deaths from Cholera.

(B) States (Part B).—The data here relate to 34 towns with an estimated population of 3,871 thousands. The total number of towns is 46 and their population is 5,194 thousands. Thus 74% of the total number of towns representing 75% of the total population is covered. The numbers of births and deaths recorded in these towns were 2,096 and 989 representing birth and death rates of 28.2 and 13 3 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
